

# KAPIL SUTHRAYE

AI & Data Engineer | Python · PySpark · SQL · LLMs

Hyderabad, India | +91 8179677882 | kapilsuthraye01@gmail.com | [Linkedin](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

AI & Data Engineer with 3+ years delivering large-scale, cloud-native data systems across banking and enterprise domains — managed 1,000+ production pipelines on GCP BigQuery and Hadoop with 99%+ SLA adherence. Expert in Python, PySpark, and LLM-powered solutions, with a proven record of processing 60 GB+ incremental loads, eliminating manual toil through automation, and migrating thousands of pipelines with zero data loss. Currently designing production-grade AI workflows at EY for Fortune 500 clients.

## EXPERIENCE

### Analyst — AI & Data Engineer · Ernst & Young (EY)

Apr 2026 – Present

Hyderabad, India

- ▶ Architecting LLM-powered data workflows for Fortune 500 clients, reducing manual data processing effort by an estimated 40% across pilot engagements.
- ▶ Designing scalable, cloud-native AI pipelines in collaboration with cross-functional squads, accelerating client digital transformation delivery timelines by 25%.
- ▶ Deploying production-grade AI solutions leveraging GCP and Python, enabling clients to operationalize ML insights at enterprise scale.

### Software Engineer — Data Engineering · LTIMindtree

Jul 2024 – Mar 2026

Hyderabad, India · 1 yr 9 mos

- ▶ Engineered and maintained 1,000+ production data pipelines on GCP BigQuery and Hadoop/HDFS, sustaining 99%+ SLA adherence across enterprise banking data feeds serving millions of downstream users.
- ▶ Built Python-based GCP automation framework for service account key rotation and operational monitoring, cutting manual security-compliance effort by ~70% and eliminating a class of human-error incidents.
- ▶ Led zero-downtime migration of thousands of production pipelines to upgraded clusters, achieving 0% data loss and reducing downstream disruption windows by over 80% vs. prior migration benchmarks.
- ▶ Delivered high-throughput ETL workflows processing 60 GB+ incremental daily loads from Oracle, Linux, and cloud storage sources, reducing average ingestion latency by 35%.
- ▶ Implemented structured logging, exception handling, and automated retry mechanisms that cut Mean Time to Resolve (MTTR) for production incidents by 50%, measured across 6 months of incident logs.

### Graduate Engineer Trainee · Larsen & Toubro (L&T) Construction

Jul 2023 – Jul 2024

Chennai, India · 1 yr

- ▶ Delivered payroll automation system using Python, Angular, and MS SQL Server, eliminating 20+ hours/week of manual processing for a team of 500+ employees.
- ▶ Built operational reporting dashboards that reduced ad-hoc data request turnaround time by 60%, enabling faster business decisions across 3 departments.
- ▶ Recognized with Super Crew Award for cross-functional delivery excellence and outstanding collaboration across engineering, infrastructure, and QA squads.

### Technology Intern · Cognizant

Feb 2023 – Mar 2023

- ▶ Gained hands-on exposure to enterprise software delivery lifecycles, coding standards, and large-scale IT service workflows across a global technology organization.

## TECHNICAL SKILLS

**Languages:** Python (OOP, Scripting), SQL, JavaScript

**Big Data & Processing:** Apache Spark, PySpark

**Cloud & Storage:** GCP (BigQuery, Cloud Storage), Oracle DB, MS SQL Server

**AI / ML:** LLMs, NLP, PyTorch, NumPy, Prompt Engineering, AI Engineering

**Data Engineering:** ETL/ELT Pipelines, Data Ingestion, Incremental Loading, Data Migration, Data Warehousing

**Backend & Dev:** Angular, Python OOP

**DevOps & Monitoring:** Linux, Structured Logging, Retry Mechanisms, CI/CD, Production Support

**Methodologies:** Agile / Scrum, SLA Management, Root Cause Analysis

## CERTIFICATIONS

---

NLP with Python · AI for Professional Communication · Ethical Hacking Workshop

## EDUCATION

---

**B.E. Computer Science – 8.11 CGPA**

2019 – 2023

*Sri Venkateswara University, India*

## AWARDS & RECOGNITION

---

- ▶ Super Crew Award — Larsen & Toubro: recognized for outstanding delivery and cross-functional collaboration.
- ▶ Multiple Client Appreciation Awards — on-the-spot recognition for 99%+ SLA adherence and sub-hour incident resolution.
- ▶ National Science Olympiad — academic excellence distinction during undergraduate studies.
